

Welcome to The Ranch!

We make the best load-bearing packs and accessories for the most demanding users in the world based on our heritage of making quality gear.

For much of the past 23 years, we've developed Load Carriage™ systems for the most demanding customers and environments out there. These highest-level users came to us because they knew of our pack-engineering pedigree. They needed purpose-built packs that would carry monstrous loads with more stability-packs that would endure relentless, in-the-field hammering without failure ... year in and year out.

Designing for this professional and industrial user has taught us about building functional, comfortable packs for hikers, backpackers, climbers, skiers, and other outdoor zealots.

This document will highlight the Mystery Ranch Fall 2023 product offering. If you would like more detailed information for all of the many different styles that Mystery Ranch makes, visit the link below or scan the QR Code to the right:

[*Fall 2023 Catalog*](#)

THE ARCHITECTURE OF A MYSTERY RANCH PACK

Bottom line – we want you to better understand our backpacks: what makes them the most comfortable packs on the planet for big, awkward, changeable loads. What patented design elements make them easily customizable to fit you perfectly. And, what materials and trim components are thoughtfully chosen to make ours the most durable backpacks available. In essence, we want you to have a crystal clear understanding what makes our packs the premium choice in an often-blurry marketplace.

THE IMPORTANCE OF LOAD CARRIAGE©

Most backpacks are designed so that the load in the bag is an integral part of forming and fitting to your back. That's very difficult to achieve since the size and shape of the load is always changing.

At MYSTERY RANCH, we don't try to make the whole load take on your exact shape. Unlike other backpack makers, we build our pack bags and the load transference systems (what we call the mainframe) separately. We design and sew our pack bags for optimal containment and taming of the load. Then we engineer a Load Carriage™ mainframe – separate from the pack bag – that can be ideally customized to fit your unique anatomy. We then engineer all of the shaping for the shoulders, waist, and hips, outside of the pack bag, so it functions independently from the distortion that compromises most internal frames. This is the key difference in MYSTERY RANCH packs.

FOCUS ON FIT

Our packs are different in that they let you adjust the yoke via a telescoping design – up and down – to fit the exact length of your torso. By moving our form-fitting molded adjuster, we move the shape as well. This is a patented feature unique to MYSTERY RANCH. In short, our telescoping harness design, in conjunction with our patented lumbar wrap, allows us to custom fit any of our packs for any customer for any mission. Our form fitting "adjuster" gives an accurate representation of your upper back.

ACTIVE FRAMING – OUR REMEDY

Our frames are built flat which helps them transfer the weight/load more effectively than an exaggerated S-curve or C-curve that you often see on the market. Though designed to perform as an active brace, MYSTERY RANCH packs are built to flex. They are not built to a generic shape that may or may not fit the user.

No matter how you move, the load comes with you. There's no sag, no gaps, no dead spots... it's a dynamic system that moves with you. Our active frames flex to a point and then resist at the end of their range. We've isolated that flex, so it has just the amount of flex your shoulders need when you walk – nothing more.

Pack Fitting

1. LOOSEN SHOULDER STRAPS. SITUATE WAIST BELTS COMFORTABLY ON HIPS AND TIGHTEN.
2. REMOVE ADJUSTER PLASTIC ADJUSTER FROM THE FLAP BEHIND THE HARNESS YOKE.
3. SLIDE THE ADJUSTER BETWEEN THE YOKE AND THE BAG TO BREAK THE VELCRO® BOND.
4. ADJUST YOKE UP OR DOWN TO TORSO LENGTH, TELESCOPING UNTIL SEAM BETWEEN SHOULDER STRAP AND YOKE BODY ALIGN WITH TOP OF SHOULDER BLADE.
5. REPLACE ADJUSTER TO ITS ORIGINAL LOCATION. THE ADJUSTER DOUBLES AS A CRUCIAL PIECE OF FRAMING IN YOUR PACK AND TRANSFERS WEIGHT THROUGH THE TORSO AND INTO THE HIPS AND CORE.

This QR Code will take you to a great video that explains the fitting process.

BACKPACKING PACKS

MYSTERY RANCH has designed and built bombproof backpacks for decades. Big trips and monster loads require intelligently engineered load-bearing designs. Good thing our backpacks distill over 40 years of field-tested, finely tuned Load Carriage™ wisdom.

We use three main active frame systems in our Expedition and Trail backpacks.

- **Terraframe** – An expandable load hauler for your biggest mountain adventures.
- **Astral Frame** – The result of over 40 years of field-testing and fine-tuning all our Load Carriage™ wisdom.
- **Endurance Frame** – Category leading back panel ventilation and should harness accessorization.

Terraframe

Astral Frame

Endurance Frame

The Terraframe Series

Go ahead, bring more!

The **TERRAFRAME SYSTEM** features patented MYSTERY RANCH technology that increases capacity. The bag removes from the frame, exposing the load shelf and allowing you to compress additional gear and awkward shaped loads for comfortable carry over long distances. This intelligently engineered load-lifting frame and harness technology gives you the edge over gravity.

Step 1:
Release
pack from
frame.

Step 2:
Expand
and insert
your load
right up
against
your
back.

Step 3:
Reconnect
pack to
frame and
compress.

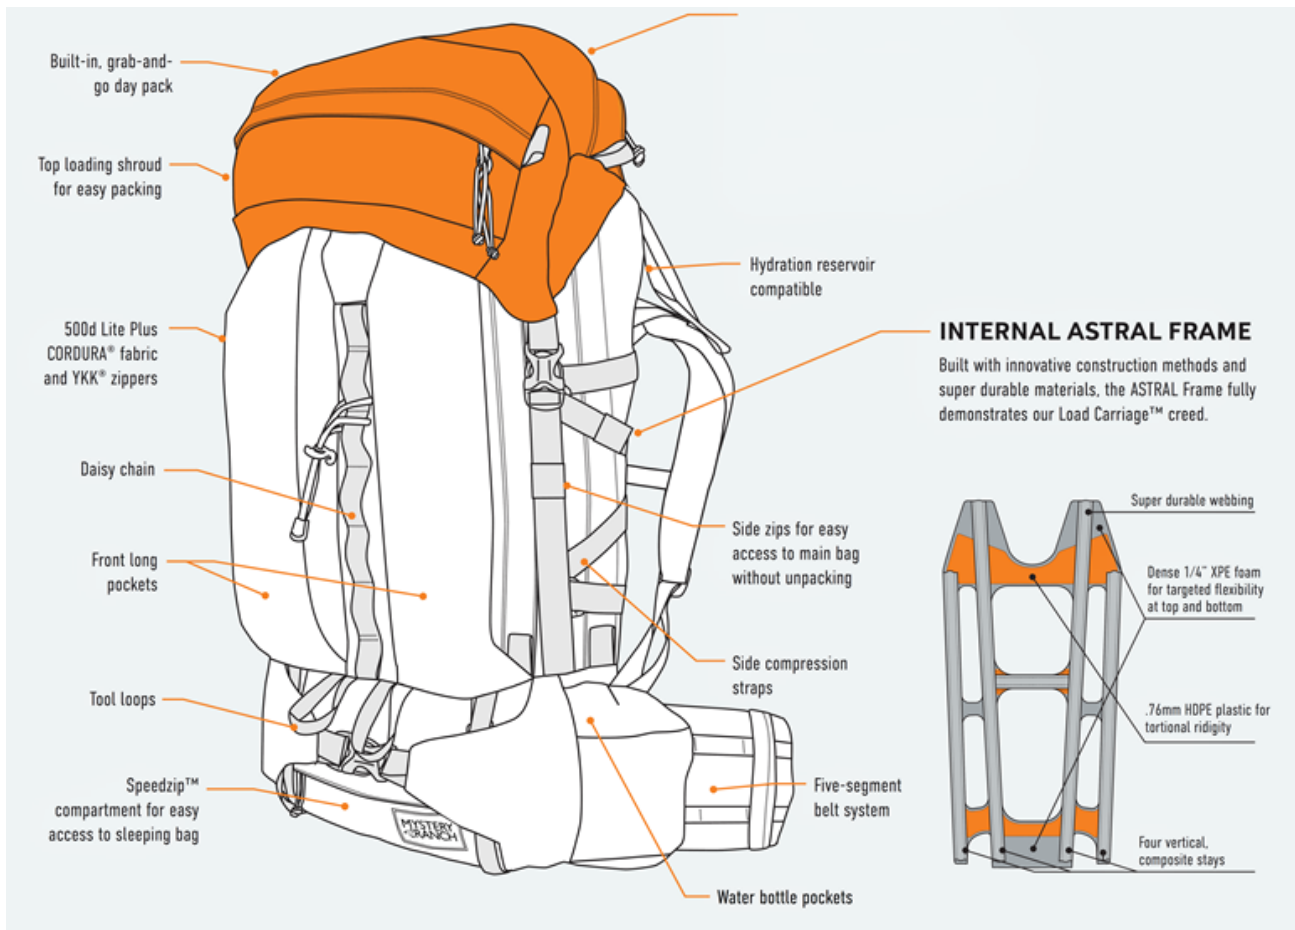

An expandable load hauler for big mountain adventures.

An expandable load hauler for your biggest mountain adventures. The **TERRAFRAME 80L, 65L & 50L** are for mountain zealots who need options when going big. We've offered the **OVERLOAD®** feature in hunting and military packs for years, yet backcountry climbers, fisherman, guides and others have been asking for a mountain-inspired version of this versatile, load-taming design. Featuring rigid, carbon fiber frame stays, the suspension allows an ideal amount of torsional flex while providing ample support for loads up to 150 lbs.

The Astral Series

Feature rich, to help you pack in further.

The **ASTRAL** frame is used in our most revered collection of packs – the **GLACIER, TERRAPLANE, and T 100** – showcase these purposeful features. Built with advanced construction methods and materials, these packs are ideal for long weekend outings as well as extended backcountry trips. These expedition packs are capable of hauling 60+ pounds of survival essentials.

Our iconic pack series for your boldest, backpacking adventures.

These packs are our most revered, time-tested expedition packs. While their legacy lines are easily identifiable, they incorporate our latest material suite, **Astral Frame**, five-point lumbar belt system, and fit and sizing. The core features and top-loading design stay true to the original, yet you'll find significant advancements in construction and fit. These packs represent both our heritage as well as our latest Load Carriage™ vision.

The Endurance Series

Designed for the seasoned hiker and first-timer alike.

The **ENDURANCE** frame is used in the **BRIDGER 35, 45, 55 and 65** offering the comfort and organization you've come to expect from MYSTERY RANCH while highlighting a redesigned, breathable frame and a new yoke featuring easy hydration access, as well as a detachable lid that converts to a hip pack. Built for the seasoned hiker and first-timer alike, the BRIDGER 55 and 65 offer a feature-rich, weight-conscious, and durable pack that supports your overnight mission.

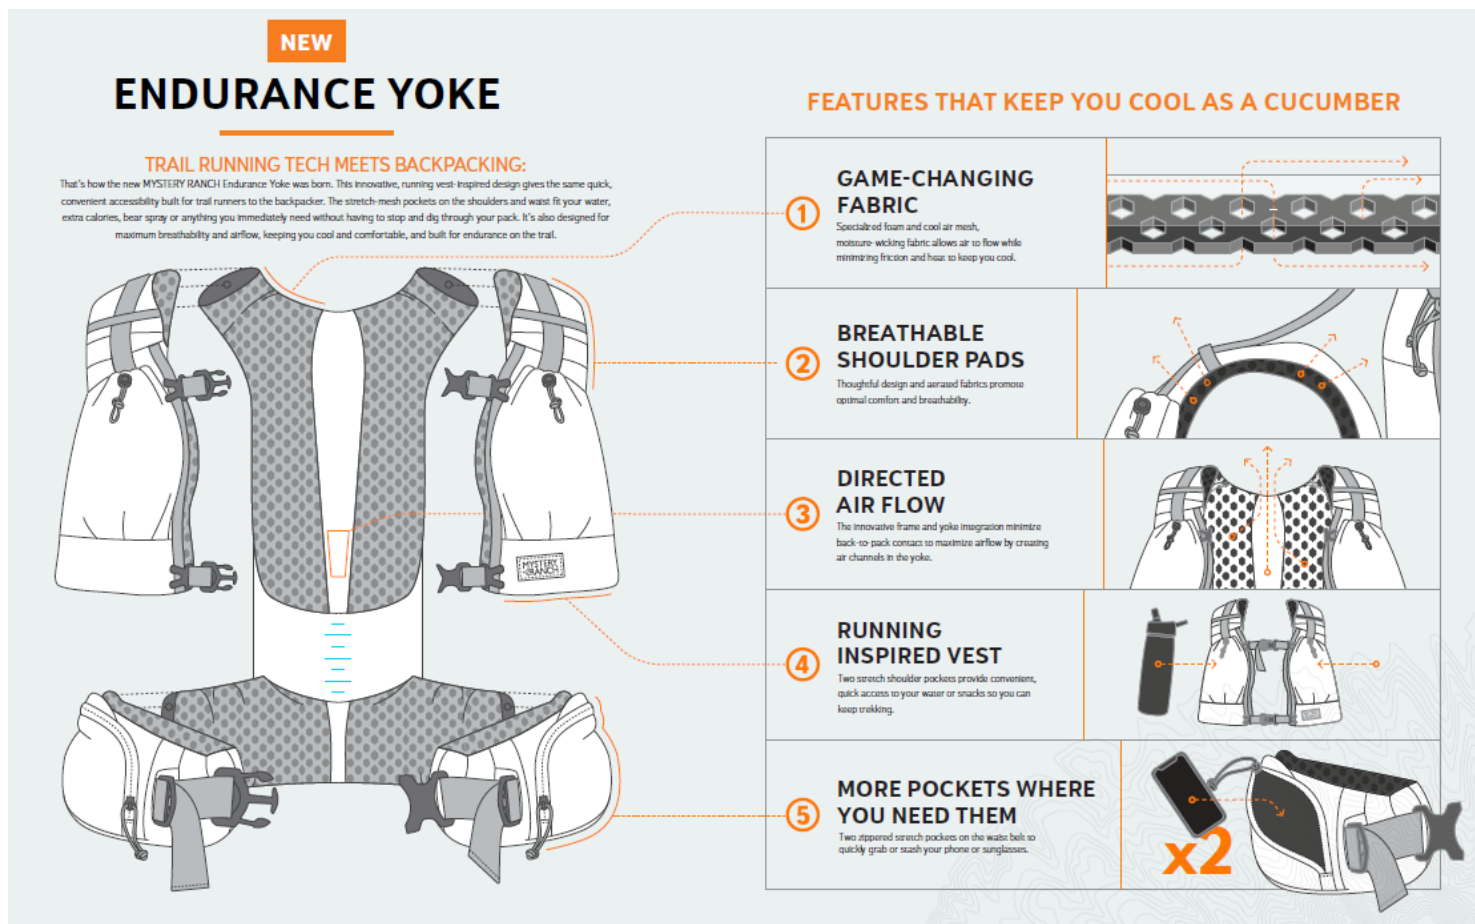

NEW

ENDURANCE YOKE

TRAIL RUNNING TECH MEETS BACKPACKING:
That's how the new MYSTERY RANCH Endurance Yoke was born. This innovative, running vest-inspired design gives the same quick, convenient accessibility built for trail runners to the backpacker. The stretch-mesh pockets on the shoulders and waist fit your water, extra calories, bear spray or anything you immediately need without having to stop and dig through your pack. It's also designed for maximum breathability and airflow, keeping you cool and comfortable, and built for endurance on the trail.

FEATURES THAT KEEP YOU COOL AS A CUCUMBER

- 1 GAME-CHANGING FABRIC**
Specialized foam and cool air mesh, moisture-wicking fabric allows air to flow while minimizing friction and heat to keep you cool.
- 2 BREATHABLE SHOULDER PADS**
Thoughtful design and aerated fabrics promote optimal comfort and breathability.
- 3 DIRECTED AIR FLOW**
The innovative frame and yoke integration minimize back-to-pack contact to maximize airflow by creating air channels in the yoke.
- 4 RUNNING INSPIRED VEST**
Two stretch shoulder pockets provide convenient, quick access to your water or snacks so you can keep trekking.
- 5 MORE POCKETS WHERE YOU NEED THEM**
Two zippered stretch pockets on the waist belts so quickly grab or stash your phone or sunglasses.

The infographic features a central illustration of the Endurance Yoke vest, showing its front and back views. The back view highlights the mesh panels and the yoke's integration with the backpack frame. To the right, five numbered callouts (1-5) describe key features: 1. Game-changing fabric with a cross-section diagram showing foam and mesh layers. 2. Breathable shoulder pads with a diagram of the pad's shape and fabric. 3. Directed air flow with a diagram showing air channels between the yoke and the pack. 4. Running inspired vest with a diagram of two shoulder pockets. 5. More pockets where you need them with a diagram of two waist belt pockets. On the far right, a full view of the BRIDGER backpack is shown, highlighting the yoke's placement on the pack.

Designed for the seasoned hiker and first-timer alike.

The BRIDGER Series backpacks offer the comfort and organization you've come to expect from MYSTERY RANCH while highlighting a redesigned, breathable frame and a new endurance yoke featuring easy hydration access, as well as a detachable lid that converts to a hip pack. The BRIDGER Series offers a feature-rich, weight-conscious, and durable pack that supports your overnight mission.

TRAIL PACKS

MYSTERY RANCH trail packs are the workhorses for your next adventure. These are our go-to-packs for various types of hikes: from half-day, head-clearing blitzes to fast and light week-long treks.

The Coulee Series

Available in men's and women's versions in the following sizes: **50L, 40L, 30L & 20L**

Accomplish your mountain mission with a “go big” mindset

For those who love to take on life with a “go big or go home” mindset, the new-generation COULEE Series is ready to help you gear up for your next foray into the wilderness. It offers exceptional load-carrying capability so you can take all the gear you need – and maybe even a celebratory beer or two. When the miles begin to stack behind you, a micro-adjustable yoke and cushioned lumbar support keep the weight comfortable. From the first step up the mountain to the last mile out of the woods, the COULEE Series equips you to accomplish your mountain mission without compromising on quality or sustainability. You can trek with confidence knowing your backpack is made from 100% recycled nylon that’s tough enough to withstand season after season of use.

Smaller Trail Packs

Covering all your needs from 32 liters to 19 liters.

Scree 32 - Men's & Women's - This mid-size, technical daypack offers ready access to your hiking kit via our signature, 3-ZIP design. The SCREE is a versatile pack with an ideal capacity for most of your outdoor adventures. Long days require ample water, so the SCREE is both hydration compatible as well as offering easy-to-reach water bottle pockets. For smaller essentials you want to keep organized, there's a spacious zip pocket built into the lid as well as on the waist belt.

Built on the premise to make eccentrically styled moves, wherever the path or rail may lead you. Meet the **GALLAGATOR**. This durably-built lightweight pack has the Ranch's 3-Zip access with a top-zipped pocket lid creating a combination, shining with versatility from navigating urban trails and lifestyle to scrambling on dirt or scree. This pack prefers the scenic route.

Most summit packs are glorified stuff bags with flimsy shoulder straps. However, our **IN & OUT** (19 & 22) is a fully engineered yet featherweight solution. Designed to stuff into its front, mesh pocket – packing the size of a small water bottle – it fits perfectly in your backpacking pack, everyday carry pack, purse, and luggage. It features contoured shoulder straps and a sternum strap. Built from 100D CORDURA® mini-rip for high abrasion and tear resistance, this full-featured, packable daypack will get you IN & OUT, whatever your mission might be.

Everyday Carry (EDC)

Not all adventures are in the mountains. MYSTERY RANCH has packs for every kind of adventure—even the everyday kind. Whether it's work, school, or a quick trip to the market, these bags will support everything from computers and books to groceries.

NEW! Catalyst 18, 22 & 26

An all-purpose backpack for the everyday mission.

This is an all-purpose pack that is built for those who have no intention of compromising on quality, comfort, or efficiency in their daily adventures. It has the capacity to handle anything from boardroom meetings to coffee shop telework sessions. With a padded laptop sleeve, organizing sleeves for a tablet or notebook, and external water bottle pockets, it's perfect for work, travel, or an afternoon hike. And it's made from environmentally friendly recycled CORDURA® Nylon that's able to withstand the rough and tumble nature of outdoor exploits.

NEW! 3 Way Briefcase – 18 & 27

Three modes, one bag, all with a little extra

The 3 WAY 27 is more than a briefcase – it's your portable office, your souped-up carry-on, and your daily companion that holds everything you need to get you through the day. It offers a suite of pockets (including one for a 17" computer) and more space for battery packs, an extra screen, and headphones. The pack is plentiful in organizational options all protected by water-resistant features like K® coated zippers. It's crafted with durable CORDURA® fabric to withstand the demands of even the most rigorous and lengthy commutes, and it does so while being better for the environment with partially recycled materials.

Everyday Carry - EDC

Our Everyday line incorporates much of the technology and construction methods of our larger packs. From your everyday laptop backpack to travel backpack and carry-on needs, our packs are meant to survive the toughest commute. Here are some of the best sellers:

The **RIP RUCK 24 & 32** will be your best travel companions because of their organization - a zip access to a separate laptop and document sleeve and a rip-zip compartment that has a zippered mesh pocket, and plenty of space for all your other must-haves. Other features include PALS webbing and daisy chain for attaching accessories, and two exterior rip-zip pockets for quick access and organization.

The **2-DAY ASSAULT** is a scaled-down option for non-military enthusiasts built into a smaller, everyday urban size and functionality. Enough MOLLE on sides and back of the pack to entertain substitutions from flash-bang pocket attachments to urban necessities. All the bells and whistles you would expect in a 3-DAP with the integrated floating computer sleeve for a non-combative lifestyle.

The **BLITZ 30 & 35** offers a tactical solution to your everyday needs. Side zip access allows you to get to every item in your pack and the external PALS webbing is ready for tech holsters or added accessories. Whether work or school, the loop-lined laptop sleeve, internal bottle pockets and attached admin lid offer rich, daily-use features, yet the hydro-ported body panel is ready for off-road adventures.

SUPERSET 30 This highly-versatile bag meets your ever-changing needs with deployable shoulder pads, side grab handles and body-panel zip access. With both top-loading and full duffel-style access to the main bag, you choose how to use it, and don't think we forgot about organization, including a bonus compartment for a change of clothes, shoes or for stashing post-gym funk.

DISTRICT SERIES

All styles are made from durable, **CORDURA® re/cor™ RN66** fabric made from reclaimed pre-consumer waste materials that have been recycled into high-quality yarns.

When it comes to your daily forays into the urban jungle, the **NEW DISTRICT PRO** is one of those bags that's going to work with you, not against you, bringing greater efficiency to your daily routine and keeping you running on time. Its array of pockets offers ergonomic storage space for everything from little items like pens, keys, and phones to larger things like a laptop or notebook. YKK DWR coated zippers team up with a protective flap over the top to keep out the elements during rainy day commutes keeping everything nice and dry.

DISTRICT 18 & 24

The DISTRICT 24 & 18 are the direct result of years of customer feedback. With a top admin pocket, dual-side water bottle pockets and a padded sleeve that fits either a 17" (24) or 15" (18) tablet or laptop, this fixed-harness pack blends style, function, and durability.

DISTRICT 8, 4 & 2

When you need more than a wallet but less than a pack, you need the **DISTRICT 8, 4 or 2**. External pockets paired with internal organization help keep your phone, glasses, ear buds and keys safe and with multiple carry options.

High Water Styles

Utilizing TRU® Zip Waterproof zippers paired with MYSTERY RANCH's ingenious construction method and materials, this collection of packs will tolerate the most extreme elements – hail, rain or shine.

MOLLE attachment

PACK LID

Fits any TERRAFRAME or
GUIDE LIGHT® MT frames
Butterfly hinge between
pockets

Snow & Ice

The **SCEPTERS (35 & 50)** are designed to adapt to the requirements of the use. A double-buckled and form-fitting lid detaches to expose separate wet and dry compartments and was made to capture a rope secured between itself and the main body of the pack. Updated extra-rugged Ripstop fabric combined with 840d nylon with carbonite coating adds extra protection.

The **GALLATIN PEAK 40** features thoughtful updates, including glove-friendly buckles and 320d Phantom Ripstop fabric with wax face coating all while maintaining the features that ski patrollers, professional guides and backcountry enthusiasts love – an oversized front pocket that fits a complete snow safety kit, top and back panel access to the main compartment and multiple carry options for ski, split board or snowboard and tuck-a-way helmet carry.

D-Route - Top-loading access allows room for your base avy kit, a place to stash skins, and a snack while keeping everything in place. We kept the 840d nylon with carbonate coating, which defends your pack against ski edges, and upgraded to Ripstop with a wax face coating to help protect the things that protect you.

The **Saddle Peak** holds 25L and has an external reinforcement panel with 840d nylon and heavy-duty Carbonite coating as well as upgraded Ripstop fabric with wax face coating to help shed water. Quick access to avy gear for time essential situations, a goggle stash pocket and external ski or board carrying modularity are all the easier now with the glove friendly buckles.

Climbing

Specifically designed for the wants and needs of climbers. Whether to carry your rope, crampons, and axes or to haul your draws, cord, and rock shoes – our climbing packs will get your kit organized.

This organizational monster, the **TOWER 47**, is feature-filled with the functions you demand as a climber. From its burly 1000D CORDURA® fabrication and splay open access to its removable components and comfortable carry, this is the perfect crag pack. Made for those that want to get to a bottom of the crag, drop the bag, and have it sprawl out with all of their equipment.

The **SKYLINE 17** is a streamlined yet versatile climbing pack covers the basic needs and then some of what a climber demands. Small in stature, its simple and flexible. It's the perfect bag to be worn for a few pitches or drug up though tight chimneys.

The **SKYLINE 23** has a great newly designed rip-zip opening and six more liters of available space than its 17 L little brother. It's perfect for climbers with a bit more to carry or for climbers of a taller stature. The opening is great for quick and easy access with out having to fear the loss of any equipment.

Travel

Haul cargo for any mission secured by rugged material fit for constant abuse. Be it the back of the truck, a horse pack, or the overhead compartment – these packs are BUILT FOR THE MISSION.

Mission Rover 30, 45 and 60 Plus

Our MISSION ROVERS are workhorse gear haulers to accommodate your varying loads that come in three sizes, designed to strategically separate your stuff. Available in three sizes – 30L, 45L, and 60 PLUS.

MISSION STUFFELS – 30, 45 & 60

Whether you live in tight quarters or tend to bring home more than you packed, the convertible MISSION STUFFEL is the low-profile travel companion you didn't know you needed.

MISSION WHEELIE5 – 40, 80 & 130

These offer bomb-proof, clamshell protection for your roller luggage. Featuring hybrid, compression molded shells sheathed in ultra-stout 1000D CORDURA®, these each incorporate the most heavy-duty, off-road wheels and hardware sets available.

MISSION DUFFELS – 40, 55 & 90

These are workhorse gear haulers to accommodate your varying loads that come in three-sizes. Designed to strategically separate your stuff, you might call them "smart duffels."

Accessories

MYSTERY RANCH accessories were designed to help customize your pack – whether quick access to essentials, extra volume, additional organization, or hydration solutions.

- Pack Flys (Regular & Hooded)
- Interior & Exterior Pockets
- Quick Draw Bino Harnesses
- Bear Spray Holsters
- DSLR Chest Rig
- Removable Water Bottle Pocket
- Mission Control – padded organizers
- Spiff Kits
