38 Product Overview

42 Katadyn Group

A high-angle, wide shot of a mountain valley. The foreground shows a rocky, grassy slope leading down to a riverbed. The river flows through the center of the valley, winding between green hillsides. In the background, more mountain ranges are visible under a bright sky. The text 'Water always finds its way...' is overlaid in white, sans-serif font, centered vertically and horizontally.

Water  
always  
finds  
its way...

71 percent of the earth's surface is covered by water. And roughly the same percent is what makes up our own bodies. Not without reason water is considered the essence of life. Only about 3.5 percent of ground water exists as freshwater and much of that is bound as ice at the poles, glaciers and permafrost. Only a small amount of water is available for drinking water - but not always in a pure form. Katadyn is committed to providing people with clean drinking water as they head outdoors and out on the trail.

# Swiss Made

Safe, simple  
and sustainable.

Katadyn is the Switzerland based market leader for portable, personal water treatment systems and products for the outdoor and marine industries. Under the guiding principle, "Making water drinking water," Katadyn develops and manufactures its portable water filters, desalinators and chemical disinfectants for camping, sailing, backpacking and global travel.

With Katadyn products, making clean drinking water is possible even in remote corners of the globe.

As functionally multipurpose as a Swiss army knife, our finely tuned product portfolio offers diverse and personal solutions for water treatment. Still made in Switzerland today, the product line ranges from water filters and tried-and-true Micropur tablets to the smallest manual desalinator for marine life saving applications. One thing all products have in common is our high standard of quality, reliability and ease of operation.

For that reason, many international aid organizations as well as the militaries around the globe rely on the survival and life-saving support from market leader Katadyn. Katadyn is a brand in the Katadyn Group portfolio.

In August 2017, Katadyn North America acquired the Steripen® brand. Steripen® adds instant purification to the Katadyn family of water treatment and outdoor product brand portfolio.

Steripen® technologies are the result of years of research and developing technology. With Steripen®, business travelers, vacationers and adventurers are now able to purify their drinking water using ultraviolet technology, anywhere they might be.

Steripen® is the first and only widely available portable UV water purifier. It destroys viruses, bacteria and protozoa—including Giardia and Cryptosporidium—in mere seconds. Its speed, effectiveness and portability have impressed end users and media alike. Backpacker Magazine, Outside Magazine, Newsweek, and the Today Show have featured Steripen® as a powerful, user-friendly water purifier for emergencies, recreation and adventure.

Life is about  
adventures.  
Yours are calling.

... find  
your  
way!

## General Information about Water Contamination

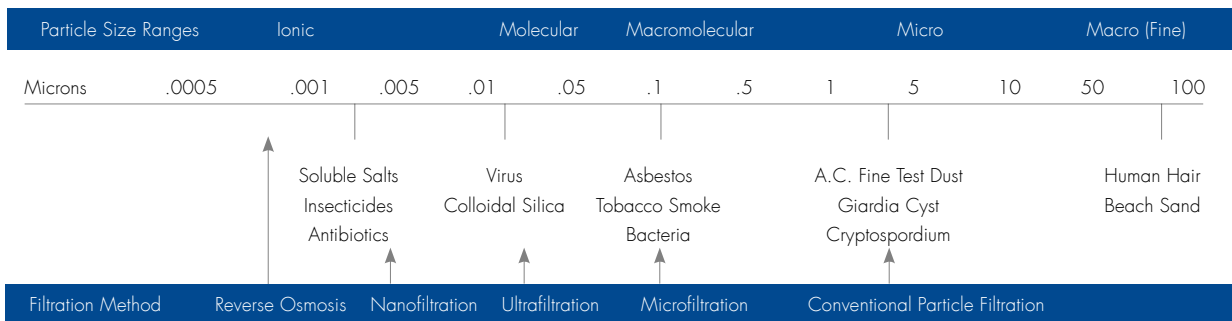

Drinking water may contain three groups of pathogenic microorganisms:

Microorganisms Class	Pathogens	Size range
	Viruses Hepatitis A, Norwalk Virus, Rotavirus, Poliovirus	-0.02 - 0.2 microns
	Bacteria E-coli (Escherichia coli), Salmonella (Salmonella Typhimurium), Cholera (Vibrio Cholerae)	0.2 -5 microns
	Protozoans Amoebiasis (Entamoeba Histolytica), Giardia Lamblia (Giardia Intestinalis), Cryptosporidium (Cryptosporidium Parvum)	1-15 microns

Source: Osmonics, Inc

A large number of additional pathogens are known besides the germs listed above. But according to the World Health Organization (WHO), their pathogenic (disease-inducing) action is only slight, or they are primarily absorbed along with food.

### Membrane Filtration Spectrum

---

## Mechanical water treatment

### Katadyn Ceramic

Ceramic filters have a microporous structure with impregnated silver, which protects the filter membrane. The pore size of Katadyn ceramic filters is 0.2 microns (0.0002mm). Bacteria range in size from 0.2 - 5 microns and like protozoa (1-15 microns) are filtered out. Ceramic filters can be mechanically regenerated, cleaned and the filter life is measurable.

### Activated Carbon

Activated carbon is used for its ability to reduce harmful organic and inorganic substances in the water. It reduces unpleasant tastes, odors, chlorine, and various chemicals. These substances adhere to the large surface area of the activated carbon. Activated carbon granulate cannot be regenerated and should be replaced.

### Glass Fiber

Superfine glass fiber within two supporting layers forms a deep filter. Nominal pore size of 0.2 micron mechanically filters bacteria and protozoa. The flexible glass fiber is pleated resulting in an extremely large surface area with a very high capacity to last a long time, even in challenging conditions.

### Hollow Fiber

Hollow fiber technology acts as a physical barrier that prevents pathogens like *Cryptosporidium* and *Giardia* from passing through the membrane. To not only clean, but extend the life of the filter, you can flush the pores of the membrane by shaking or swishing the filter in water. Hollow fiber can work in a variety of temperatures and climates, but can be damaged if left to freeze.

### Ultraviolet

Ultraviolet (UV) water purification is the fastest and easiest method for purifying batches of water. UV rays are effective in wilderness acquired water and tap water alike. Steripen's powerful UV rays penetrate harmful pathogens and destroy illness-causing microorganisms by wreaking havoc on their DNA.

## Chemical water treatment

### Chlorine Dioxide

Chlorine is the most commonly used substance for water treatment worldwide. It works quickly and has a broad range of applications. However, chlorine and iodine are not suitable for removal of *Cryptosporidium* and must be applied in the correct dosage. Chlorine Dioxide, as found in Micropur MP1 tablets, is effective against all types of microorganisms, including *Cryptosporidium*, even in the most challenging conditions.

Katadyn ceramic filters are long lasting and extremely durable. Easily cleaned and maintained in the field, each filter's microporous structure is combined with impregnated silver to protect the filter membrane.

The filter pore size of 0.2 microns (0.0002mm) filters out bacteria ranging in size from 0.2-5 microns and like protozoa (1-15 microns).

- Effective against microorganisms
- Suitable for clear to extremely dirty water
- Ceramic filters can be cleaned and reused several times
- Filter capacity is measurable
- Silver added to the ceramic helps protect the filter membrane

Category includes: Pocket, Pocket Black Edition, Drip Ceradyn and Expedition

### Quick facts

Effective against Microorganisms   Bad taste  Chemicals 

# Katadyn Pocket

## Rugged durability

Extreme adventures require efficient, long-lasting, durable filtration. This steel, bomb-proof Pocket filter is a rugged workhorse with superior capacity of one liter per minute.

For decades military and emergency professionals around the world put their trust in the Pocket's ability to deliver water free of bacteria and protozoa. The Pocket also comes with a 20-year warranty.

- 1 Ergonomic pump handle** - Comfortable grip
- 2 Exclusive silver impregnated ceramic cartridge** - Removes Bacteria, Giardia and Cryptosporidium
- 3 Highest quality construction** - 20 year warranty
- 4 Carbon bottle adapter** - Reduces chemicals and improves water taste (sold separately)

4 liters/min

Tested to 100,000 liters, depends on water quality

12.7 lb (5.8 kg)

8 x 23 in (20 x 55 cm)

SKU# 8016389 US & CAN

# Katadyn Drip Ceradyn

## Self-contained water filtering station

All the benefits of our ceramic filtration with greater capacity and volume. The free-standing container produces four liters per hour in a ten-liter container. Clean water with no electricity, no pumping and no moving parts. The Drip Ceradyn is a must-have for groups, basecamps, cabins or recreation areas.

- 1 Three silver impregnated ceramic elements
- 2 No pumping needed
- 3 Two 10 liter containers for dirty (top) and clean (bottom) water
- 4 Spigot for easy dispensing of treated water

### Quick facts

-  Effective against microorganisms
-  Suitable for groups up to 10 people
-  Suitable for extremely dirty water
-  Durable construction for daily or very frequent use
-  Stationary use

-  Field cleanable, 0.2 micron ceramic depth filter
-  4 liter/hr
-  Tested to 150,000 liters , depends on water quality

The superfine, flexible glass fiber is pleated, resulting in an extremely large surface area with a very high capacity, providing a fast flow rate with very little effort. Our unique glass fiber filters provide the same Katadyn durability as our ceramic filters, but are lightweight, compact and less susceptible to freezing temperatures – an ideal choice for all-season use. Nominal pore size of 0.2 micron mechanically filters bacteria and protozoa.

- Low pumping effort with high filter performance
- Lower initial cost
- Effective against microorganisms
- Suitable for clear to cloudy water

Category includes: Vario, Hiker Pro Transparent & Hiker

# Katadyn Vario

## Variable filter that offers higher output or longer life

Ceramic, glass fiber and carbon means that you choose fast flow and/or longer life based on water quality/water source, if water looks murky, then change dial to longer life and water will utilize ceramic disk prior to glass fiber. If water looks clear, set to faster flow and bypass the ceramic pre-filter. Carbon pre-filter is also replaceable. Fits directly onto water bottles, 2 liters per minute flow, ceramic is field cleanable, ergonomic pump action.

- 1 Dual action pump** - Provides maximum output
- 2 Multi-stage filtration system** - Adjustable to "Longer Life" or "Faster Flow"
- 3 Replaceable carbon core** - Improves taste and reduces chemicals
- 4 Adaptor base** - Attaches directly to water bottle

### Quick facts

Effective against microorganisms, bad taste & chemicals

Suitable for groups up to 5 people

Suitable for extremely cloudy water

Stable, lightweight construction for my frequent use

Lightweight and portable for on-the-go adventures.

+ + Anti-clog Technology, 0.2 micron glass fiber filter, Replaceable carbon core & Cleanable pre-filter

2 liters/min

Tested to 2,000 liters, depends on water quality

15 oz (425 g)

7.5 x 4 in (19 x 10 cm)

SKU# 8014931 US, 8014932 CAN

# Katadyn Hiker Pro Transparent

## Go light and fast

Easy to use and easy to maintain. Popular for backpacking, lightweight, good for solo or groups of 2-3. Includes additional pre-filter screen to lengthen life, techy look, quick connect fittings to connect to most hydration bladders.

- 1 Cleanable filter protector** - Extends cartridge life
- 2 Glass fiber filter** - Removes bacteria, giardia and cryptosporidium
- 3 Activated carbon core** - Improves taste and reduces chemicals
- 4 Quick connect fittings** - For easy installation/removal of input and output hoses
- 5 Translucent housing for better visibility**

### Quick facts

Effective against microorganisms, bad taste & chemicals

Suitable for 1-3 people

Suitable for cloudy water

Stable, lightweight construction for more frequent use

Lightweight and portable for on-the-go adventures

Katadyn Steripen's water activated UV purifiers quickly and easily purify your water without the use of harmful chemicals. Designed for use when traveling, camping or hiking. The Katadyn Steripen<sup>®</sup> is ultra-lightweight, compact and rugged. Takes just just 90 seconds per liter to zap viruses, bacteria and protozoa. The Katadyn Steripen's proven reliability means assurance of treatment when and where you need it most.

- Easy-to-use, just press button, place in water, and stir
- Reusable
- Lightweight and small
- Purification (eliminates viruses)
- No chemicals needed (for people who are concerned about harming nature with chemical based products)
- No chlorine taste after purification

Category includes: Katadyn Steripen<sup>®</sup> Ultra, Katadyn Steripen<sup>®</sup> Adventurer Opti™, Katadyn Steripen<sup>®</sup> UltraLight, Katadyn Steripen<sup>®</sup> Classic 3

# Katadyn Steripen<sup>®</sup> Ultra

## Today's most advanced UV water purifier

Our flagship model employs the most advanced user interface featuring a user-friendly OLED display. Steripen Ultra features an internal lithium-ion battery that can be recharged with any USB interface.

- 1 Lamp cover** - Protects UV lamp
- 2 UV lamp** - Illuminates while purifying your water
- 3 Water sensing pins** - Senses when UV lamp is immersed in water and safe to activate and operate
- 4 Rubberized neck** - Allows your Steripen to mate and seal with small mouth bottles (20-26mm)
- 5 Volume selection instructions** - Printed right on your Steripen
- 6 Activation button** - Press 1 time for 1L, 2 times for 0.5L
- 7 OLED screen** - Display that shows treatment volume & status, battery life indicator and UV lamp life indicator
- 8 USB end cap** - You will never need to replace this battery!  
Convenience and simplicity of USB rechargability  
**On one charge, you are able to purify approximately 50 liters**

Katadyn Micropur is a fast, easy-to-use water purification tablet that works quickly to disinfect water. Micropur MP1 inactivates all protozoa, harmful bacteria, viruses, and cysts. It keeps water free from germs, algae and odors. It is the only tablet currently registered by the EPA that effectively controls *Cryptosporidium*. Micropur MP1 tablets are a great solution for travelers, or anytime water is clear or filtered, but potability is questionable.

# Katadyn Micropur MP1

## Quick facts

Effective against all microorganisms and viruses

For solo use

Suitable for all fresh water types

Suitable for occasional use

Lightweight and portable for on-the-go adventures

## The Best Choice - Safer than Chlorine Tablets

Micropur MP1 is an easy-to-use water purification tablet that is effective against harmful bacteria, viruses and cysts. It is the only tablet or liquid currently registered by the EPA that effectively controls Cryptosporidium, a waterborne cyst. Extensively tested using EPA testing protocols. The test data is summarized below.

## Katadyn Micropur MP1

### Drinking water disinfection and conservation

Fast and effective water disinfection. Essential item for any traveler to avoid contaminated water (e.g. brushing teeth, drinking water). Micropur MP1 inactivates all protozoa, bacteria and viruses. It keeps water free from germs, algae and odors. Great for use in water bottles and hydration bladders. Used extensively by U.S. Military.

## Katadyn Group. Sustaining life no matter where.

The KATADYN GROUP is a global corporate group specialized in the area of self-sufficient cooking, nutrition and drinking water treatment. Its brands include Katadyn, Optimus, AlpineAire Foods, Trek'n Eat, Pharmavoyage, Micropur, Certisil and Spectra Watermakers. With this broad brand portfolio, the group provides products and solutions for the outdoor and marine industries as well as for industrial and municipal needs. Its diverse product offering ranges from freeze-dried specialty meals and outdoor cooking gear to mobile and land-based water desalination systems and specialized disinfection systems for the pharmaceutical industry. Humanitarian aid organizations and the military for years have been regular customers of the Swiss group of companies.

With headquarters in Kempththal (Zurich), the KATADYN GROUP employs more than 200 people at its headquarters and subsidiaries around the world.
