MIPAN
regen robic

The most environmentally friendly products are those that endure — which is why since our founding in 2000, MYSTERY RANCH has been committed to protecting the environment. Minimizing poly bagging and incorporating recycled and recyclable materials in our packaging program was a start, and in 2022 we took it one step further by incorporating recycled fabrics into our packs. For spring 2023, the COULEE SERIES incorporates 100% recycled nylon: MIPAN Regen Robic.

MIPAN Regen Robic is the first recycled high-tenacity nylon made from 100% reclaimed waste (pre-consumer), developed for eco-conscious enthusiasts who rely on their gear wherever the adventure takes them.

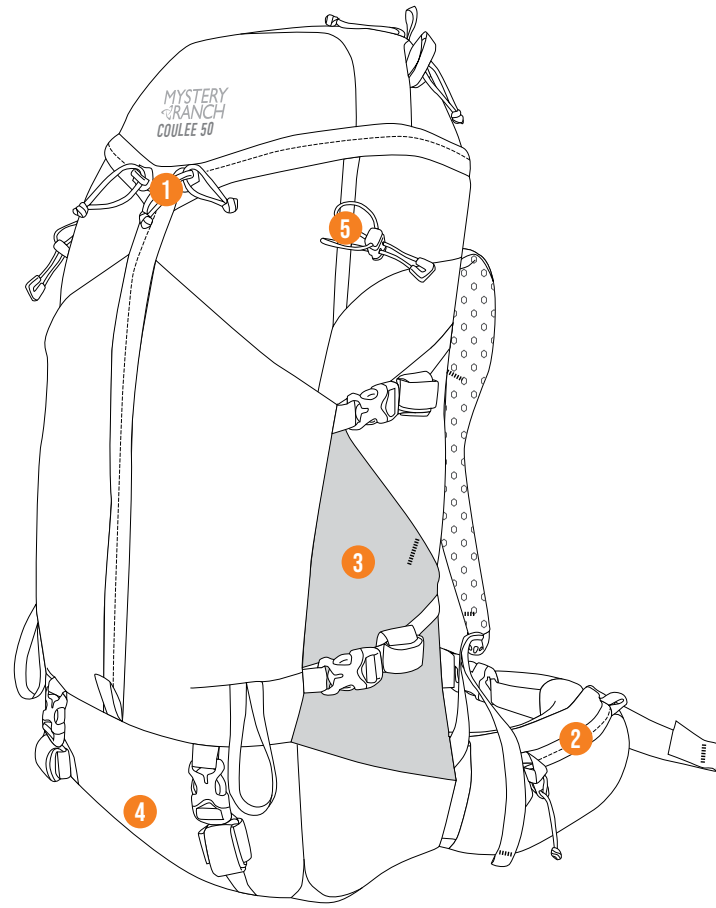

Recycled. Robust. Resilient.
